

# On-Ramp to Azure Data

1

## Kickoff

- › Program overview
- › Scope
- › Timeline
- › Deliverables

2

## Planning & Discovery

- › Architecture Design Session to identify inventory assets and infrastructure discovery.
- › Assessment of infrastructure and networking for performance, sizing, cost and functionality

3

## Deployment

- › Our team will build the foundation and facilitate deployment of your Azure Data and Analytics platform with an approach and set of recommendations for your Azure migration.

4

## Platform Adoption

- › Azure Platform Workshops & Labs with targeted hands-on training on Azure products and services completed in your Azure subscription
- › Azure Security Foundations – A prescriptive approach for establishing a secure by default platform in Azure
- › Data Science process lifecycle to create an approach and set of recommendations

5

## Use Case Execution

- › Understanding of your business case to clearly understand and define the business objectives and expected outcomes and source data.
- › Data Acquisition and Modelling to establish a conformed process for onboarding data including complete feature engineering and model training.
- › Deploy models and pipeline to a production-like environment for final user acceptance.

6

QUISITIVE MANAGED DATA SERVICES

WEEKS 1 - 4

## Quisitive Managed Data Services

Quisitive Managed Data Services continues your data journey in a predictable, monthly subscription model. Through continuous use case execution, MDS provides rapid business value by following the same methodology and approach laid out in the first 30 days. Additionally, your managed data services subscription includes the operational support needed to run, monitor, and manage your services within Azure Data Platform, giving you peace of mind knowing the day-to-day details are taken care of.

## Custom Project

As a premier Microsoft solutions provider, we have the deep technical expertise to customize a project to fit your business objectives and reach your goals regardless of the environment size or complexities.
