

Embrace patient-centered, collaborative care

with MazikCare’s Healthcare Cloud Solutions

More than ever, healthcare processes must be agile, streamlined, collaborative, and patient-forward to succeed.

MazikCare is a set of healthcare-ready business solutions that enhances end-to-end business operations across the care continuum so healthcare teams can spend more time on what they do best: treating patients.

Built on Microsoft Dynamics 365 and utilizing its Health Accelerator and Microsoft Cloud for Healthcare, MazikCare streamlines and unifies each patient record cutting down on vendor bloat and enabling care providers to save time and resources.

MazikCare is the **only platform on the market ready for healthcare businesses from Day 1**, offering reduced implementation time, lower total cost of ownership, and accelerated ROI.

Enriching the human experience through innovation.

Healthcare Cloud Solutions

Enable frictionless patient care through a unified data platform

- Curate accurate enterprise data from EMR, financial, and other IT systems through secure integration into a single platform
- Improve business operations with AI insights from connected data sources
- Boost employee satisfaction by automating intelligent worklists and centralizing IT workflows

Empower patients to take charge of their health

- Reduce no-show rates and improve care plan adherence with in-app forms, reminders, transportation tools, supply orders, and care plan tracking
- Enable shared decision making through secure information sharing and virtual communication between patients, caregivers, and multiple providers
- Leverage insights from unified patient profiles to craft personalized patient journeys that engage patients in their care

Engage physicians for seamless care collaboration

- Attract providers with robust marketing targeted by specialties, patient volumes by CPT codes, payer mixes, and more
- Engage physicians through streamlined provider onboarding and relationship insights in unified provider profiles
- Increase patient appointments with digital referrals and automated service scheduling workflows
