

Power Platform Improvement Program

Enabling the promise of the Power Platform while negating the challenges of adopting a new technology ecosystem and helping you avoid costly security, governance and licensing mistakes.

Quisitive's Power Platform Improvement Program gives you access to a team of Power Platform experts with vast knowledge in Power Automate, Power Apps, Power BI, Power Virtual Agents and Dynamics 365 applications, expanding your IT team. Our experts will monitor your API utilization, resources, workflows, automations, connectors, environments, storage allocations, usage, license allocations and other critical aspects of maintaining and supporting your Power Platform.

Power Platform experts will continuously provide strategic recommendations on optimizing your environment as your business needs and goals change. Your **Power Platform Solution Coaches** will proactively develop roadmaps to optimize your environment, whether your needs are in health, security, or the use of the platform for increased productivity. You will also have access to our **Flex Services**, a group of technology experts who will implement the roadmap recommendations and provide risk mitigation for security, compliance, and data governance concerns. Quisitive's experts proactively identify and solve issues, rather than react to issues as they occur.

What You Get: Monthly coaching findings and recommendations; access to support team
