

Empower your citizenry to connect and interact

Quisitive PowerGov is a community development application for permitting, business licensing, code enforcement, and maintenance management.

The rapid pace of innovation and societal changes are presenting new challenges for cities and state & local governments. Sector leaders are seeking new ways to become more efficient with public money, ensuring security-enhanced data, and delivering new services with greater engagement with citizens.

Formerly MazikCity, Quisitive PowerGov is fully integrated with Microsoft Dynamics 365 for a full view of operations and citizen requests. This application will streamline and automate workflows to allow offices to be more efficient and better meet the demands of modern citizens and businesses.

FEATURES
