

Microsoft Solution Assessment Program

# Security Assessment

## Mitigate risk and understand how to cultivate a secure cloud environment with Qusitive's Security Assessment.

Our Security Assessment, built in partnership with Microsoft's Solution Assessment Team, will help your organization understand your cross-platform security posture, evaluating vulnerabilities and identity risks with recommendations to mitigate these.

Qusitive is one of only a handful of Microsoft partners that holds all four Microsoft Security Advanced Specializations, with experts ready to...

- ✓ **Understand your goals and chart objectives** with Strategy & Plan and Zero Trust Framework Workshops
- ✓ **Review O365 & Azure Secure Scores** and provide recommendations to improve
- ✓ **Review current IT landscape** to identify unsupported operating systems and services, unmanaged devices, and user vulnerabilities
- ✓ Deliver a **Security Improvement Roadmap** to help your organization continuously improve

# Security Assessment

## Security Assessment Overview

### Signal Enablement & Collection

In a 30-minute kickoff session, our experts enable a collection of signals to analyze and identify user and data risks in your environment. We then collect and interpret data for approximately 2 business weeks before preparing findings presentation.

### Conduct Framework Workshops

Quisitive experts will then deliver 2 workshops to better understand the clients goals: one 2-hour Cloud Adoption Framework workshop and one 2-hour Zero Trust Security Framework workshop.

### Return on Investment Analysis

We then deliver a financial model to show projected changes in licenses and Azure consumption to align with recommended changes identified in the security improvement roadmap.

### Security Assessment & Findings

Finally, we develop a remediation plan and roadmap based on the findings once data collection is complete and information from workshops is collected. These findings are presented in one 3-hour call.

Contact us to learn how to get started.
