

Connecting the shop floor to the top floor with Quisitive ShopFloor.

Quisitive ShopFloor offers user-friendly and fully accessible manufacturing-ready solutions. ShopFloor facilitates data collection and eliminates manual paper-based processes to increase efficiencies, standardize operations, decrease downtime, better plan projects, and provide real-time insights for decision-making.

With ShopFloor, you can eliminate clipboards and empower your production managers to digitally track projects, equipment, time, inventory and process flows.

Downtime on the shop floor can add up to

— **\$50,000** —
LOST PER MINUTE

(ATS) <https://news.thomasnet.com/companystory/downtime-costs-auto-industry-22k-minute-survey-48107>

Connecting the shop floor to the top floor

Quisitive ShopFloor offers user-friendly and fully accessible manufacturing-ready solutions. ShopFloor facilitates data collection and eliminates manual paper-based processes to increase efficiencies, standardize operations, decrease downtime, better plan projects, and provide real-time insights for decision-making. With ShopFloor, you can eliminate clipboards and empower your production managers to digitally track projects, equipment, time, inventory and process flows.

ShopFloor is fully integrated with **Microsoft Dynamics 365** for a full view of manufacturing, personnel, and project operations. Ditch the paper and clip boards for fully connected and digital manufacturing execution and reporting.

Fully integrated, efficient & connected manufacturing execution

MANUFACTURING EXECUTION

Easily track labor, jobs, downtime, KPI's and waste to optimize delivery and reduce costs.

MACHINE MONITORING

Get real-time monitoring of machines to ensure telematic and safety standards are being met and to better predict maintenance.

EASY & ACCESSIBLE INTERFACE

Give your production team a solution, not a problem. With an intuitive, mobile interface, you are assured easy adoption and usage by all staff and leaders.

IoT for Manufacturing

Transforming your business to accommodate the immense benefits of IoT can be a daunting consideration but is one you need to take seriously to stay competitive.

Our AI-driven products help you realize incredible efficiencies. In addition, our expertise in developing use cases provides peace of mind when identifying each organization's process improvement needs. Don't be left behind!

At Qusitive, we have created a broad portfolio of Common Data Service products using our very own proprietary IoT cloud platform. As a Microsoft Gold-Certified Development Partner, we're experts at what we do and can identify exactly which remote metering products will work best for you.

Get unprecedented connectivity. Combined with our powerful remote management hardware, we can help you develop the infrastructure that allows you stop crawling and instead sprint forward with Azure IoT.

Your digital transformation journey starts here

Predictive Maintenance

Telematics & Safety

Connected Field Service

Remote Management IoT

Data Warehouse And Integration

Custom Reporting & Dashboards

Lacking comprehensive machine information can be costly and result in unnecessary downtimes.

With ShopFloor, you can collect machine performance data to predict failures and intervene preemptively to minimize downtimes.

Manufacturing companies that monitor their metrics in real-time **outperform others by 6% in overall equipment effectiveness.**
