QUISITIVE

Quisitive PowerGov

Empower your citizenry to connect and interact

PowerGov

Quisitive PowerGov is a community development platform for permitting, business licensing, code enforcement, maintenance management, grant management, and utility billing

The rapid pace of innovation and societal changes are presenting new challenges for cities and state & local governments. Sector leaders are seeking new ways to become more efficient with public money, ensuring security enhanced data, and delivering new services with greater engagement with citizens.

PowerGov is fully integrated with **Microsoft Dynamics 365** and **Power Platform** for a full view of operations and citizen requests. This application will streamline and automate workflows to allow offices to be more efficient and better meet the demands of modern citizens and businesses. **Features include:**

Permitting, Business Licensing & Planning & Zoning
- Easily and intuitively manage application and renewal processes.
- Support fully automated fees and payment processes online for contractors and business owners

Maintenance Management
- Transform and digitize assets maintenance, work orders and condition investigations.
- Enjoy mobile, field access to automated workflows, work orders, reports and more.
- Automatically schedule recurring preventative maintenance activities.

Grants Management
- Track grants using intuitive dashboards.
- Enforce standard procedures for grants with easy-to-use, graphical process flows.
- Apply for grants via portal and score applications using configurable criteria.

Code Enforcement & Inspections
- Track city disruptions, citizen complaints & security issues.
- Track inspections and violations and coordinate remedies.
- Access and management property ownership, inspection results, photos and move via mobile field devices.

Self Service & Mobility
- Provide self-service functionality for citizens, business owners and city employees,
- Allow businesses to apply for or renew licenses remotely.
- Access utility bills for statements and payments.

Utility Billing
- Maintain account, rate and meter data.
- Manage mover ins/outs.
- Import electronic reads and calculate amount due.
