

5 Reasons to Migrate SQL Server & Windows Server to Azure

1 Cost savings

With Azure Hybrid Benefit, make the most of your Microsoft investment and migrate workloads to Azure using familiar skills, tools, and practices.

Save up to **85%** over pay-as-you-go rates with Windows & SQL Server licenses

\$1B
yearly investment in security by Microsoft

2 Industry-leading security

Take advantage of multi-layered security across physical datacenters, infrastructure, and operations. Built-in protections free up operational resources.

\$4.3 M
average cost of security breach

3 Maximum agility

Connect your on-premises infrastructure, data and mission-critical apps to the cloud for maximum agility and value from your existing investments.

Run apps from anywhere

5x increase in business agility

4 Opportunity to innovate

Spend less time running servers and more time innovating with all Azure brings: the Internet of Things, machine learning, data analytics, and AI.

Staff productivity increased by up to **25%**

3.6x
FASTER PERFORMANCE of SQL server on Azure

5 End of support is here

Avoid system vulnerabilities by upgrading to latest release or moving to Azure.

Deadlines:

Jan 10, 2023

SQL Server 2008 end of extended security updates

Jul 9, 2022

2008 R2 end of extended security updates

Jul 12, 2022

SQL Server 2012 end of support

Oct 10, 2023

Windows Server 2012 & 2012 R2 end of support
