

MazikCare Digital Care Coordination Platform

Streamline real-time communication and coordination across health teams and patients for faster, better health outcomes and care deliver

Re-shaping traditional, siloed models of care

Powered by Microsoft technologies, the **MazikCare Care Coordination platform** connects healthcare providers, patients, and stakeholders on a single platform to collaborate and communicate effectively in delivering comprehensive and well-coordinated care.

The MazikCare Care Coordination Platform empowers health teams to take proactive and intelligent control over patient care across multiple healthcare providers and settings.

Improve patient
outcomes

Enhance patient
experiences

Reduce wait times,
risks, and costs

Enable seamless
collaboration among
healthcare providers

Create a Digital Bridge Between Patients and Care Teams at Every Stage of the Healthcare Journey

Unified Patient Records:

MazikCare Care Coordination provides a comprehensive, unified view of patient records from various sources such as Electronic Health Records (EHRs), case management system, lab results, diagnostic images, and more. With easy access to patient history and information, providers can make fast, well-informed decisions.

Secure Collaboration and Referral Management:

MazikCare Care Coordination facilitates secure, real-time communication between different care teams, ensuring they can efficiently discuss treatment plans, share insights, refer physicians, and collaborate effortlessly. This enhances cross-disciplinary cooperation and leads to better patient outcomes and significant efficiencies and cost savings for providers.

Care Plan Management:

MazikCare enables the creation, management, and tracking of personalized care plans for individual patients. Providers can easily monitor patient progress, set reminders for medications, appointments, and follow-ups, ensuring adherence to treatment protocols.

Patient Engagement Tools:

Engaging patients in their own care is vital for successful outcomes. MazikCare offers interactive tools for patients, such as self-assessment surveys, access to results, medication plans, and appointment scheduling, fostering a sense of empowerment and reducing the costs on non-compliance.

Analytics and Insights:

Leveraging advanced analytics, MazikCare Care Coordination generates actionable insights from patient data, population health trends, and care team performance. These analytics aid in identifying gaps in care, optimizing resources, and making data-driven decisions.

MazikCare Care Coordination Platform

Faster, better health outcomes and care delivery.

Set Up Quickly and Maximise Your ROI

Lean on our team of healthcare technology experts to guide you through the planning, setup and launch of your new Care Coordination Platform. We work closely with every client to ensure maximum return on your technology investment.

Integrated & Secure Healthcare Applications

MazikCare Care Coordination supports SMART on FHIR, the most advanced and secure way to electronically exchange patient data in real time. We will work with you to securely integrate your data from various applications, so your team has access to one source of patient information for brilliant planning.

Reduce Costs with MazikCare's Care Coordination Platform

MazikCare Care Coordination ensures your teams can reduce costs while optimizing care delivery.

- Reduce hospital readmissions
- Improve medication management
- Streamline administrative processes and reduce burnout
- Enhance chronic disease management
- Decrease healthcare utilization
- Improve referral relationships
- Reduce wait times and increase patient satisfaction

MazikCare Care Coordination in Action!

Case Study:

Arthur Health leverages MazikCare Care Coordination platform to create new models of connected care to reduce patient wait times by 80% and save millions in unnecessary MRIs.
