

Unlock AI-powered productivity with Microsoft 365 Copilot

Stay up to speed with the newest ways of using AI in your day-to-day tasks

Microsoft 365 Copilot provides a whole new way of work

Leverage the power of Large Language Models and Microsoft 365 Graph to turn your words into actions embedded across Microsoft 365 applications.

M365 Copilot enables you to:

Uplevel skills

by providing rich functionality using natural language

Unleash creativity

by saving hours writing, researching, and editing

Unlock productivity

by automating tasks and summarizing long documents

Putting Generative AI to work

Unlock data AI-driven insights

Analyze and explore your data seamlessly a single prompt, with no need for formulas or modifications.

Identify key insights by analyzing and visualizing in a prompt.

Identify trends, correlate data, and visualize it with intuitive commands.

Effortlessly highlight, filter, and sort data to focus on what truly matters.

Run complex calculations with ease using formula column suggestions.

Make your Words shine

Generate content, text summaries, and make edits to supercharge your creativity and free up time for more valuable tasks.

Create effortless drafts based on the document outline or structure.

Save time and boost productivity by recapping documents.

Add and customize text in specific sections to specific writing tones.

Enhance your document with text-to-table transformation.

Make your Inbox a happier place

Catch up, prepare, follow-up, manage meetings, and write impactful communication in a fraction of time.

Compose emails quickly striking the right tone by getting recommendations.

Condense long email conversations into short, informative summaries.

Organize your inbox by promptly responding to high-priority emails.

Write full-length email drafts based on other documents.

Create and repurpose Presentations like a pro

Transform your documents into polished, personalized, and professional-looking presentations with nothing but ideas and vision.

Create presentations from scratch using just natural language commands.

Condense text-heavy slides into those with concise bullet points.

Generate bulleted summaries of your lengthy presentations

Quickly rephrase text and restructure slides to craft on-topic presentations.

Harness insights from your Meetings and Chats

Streamline communication, foster team alignment, and get actionable to-do lists from Teams Meetings and Chats.

Let AI take meeting notes organized into highlights, and action items.

Pre-fill meeting agendas based on chat history and related documents.

Understand POVs of colleagues on specific topics by analyzing chats.

Get meeting summaries, to-dos, and action items even without attending.

Create value with AI-enhanced collaboration

Keep your team synchronized by brainstorming, collaborating, creating, and summarizing all the content on the Microsoft Loop Page.

Insert document summaries on top of any page, in a click.

Automatically summarize customer conversations with specific citations.

Quickly pick data sets from excel and turn them into complete tables.

Highlight key items by mentioning team members in your project.
