Secure AI Quick Start
in One Snapshot

A Microsoft-aligned engagement to validate AI readiness, identify security gaps, and build a guardrail-based roadmap for scaling AI with confidence.

The 3-Week Experience
at a glance

1. Zero Trust Snap Assessment
Benchmark identity, data, apps, and governance posture
OUTCOME: A prioritized 30/60/90 day plan

2. Customer-Run Data Collection
Run lightweight scripts with least-privilege access.
OUTCOME: Secure, self-run evidence collection inside your tenant

3. Interactive Results with Guided Copilot
Access findings, insights, and transcripts through a secure workspace.
OUTCOME: Clear, visual intelligence ready to share.

4. Data Security Reality Check
Purview scan and Security Copilot triage to surface first remediation actions.
OUTCOME: Immediate visibility into exposure and security gaps.

5. Mini AI Use Case Triage
Workshop top AI opportunities and guardrails with experts.
OUTCOME: A prioritized list of safe, high-impact AI use cases.

What Leaders Gain

For Security Leaders:
- Understand where AI creates new identity and data risks
- Validate Zero Trust maturity
- Present measurable board-ready risk insights

For IT & Data Executives:
- Map how Copilot interacts with sensitive data
- Use tools you already own to secure AI
- Build a scalable, compliant AI foundation

1,400+ security assessments delivered
